

Download instructions for PC users

Educational resources commonly come as downloadable zip files. If you are unfamiliar with these and work off a PC, the following steps should help.

STEP 1

Once the download is complete, it will appear as unit-3-leaflet-assets.zip in your downloads folder

STEP 2

Right click on the folder and you should see a zip extractor in the dropdown menu.

STEP 3

As you move your mouse over the zip extractor, you will see a sub menu from which you will have 3 options that will extract the files. These are...

Extract,

extract here

or

extract to "folder name of zip file\"

We would recommend you choose extract to "folder name of zip file\" to keep the files together and make them easier to find.

STEP 4

The extraction progress bar will now appear. Times will vary depending on the speed of your PC.
